SEEDS

What to Plant and When to Plant It

(AS APPLIES TO THE PECOS VALLEY OF NEW MEXICO)

JANUARY—After making out a list of all seeds you wish to plant, mail it to the Roswell Seed Co., with full shipping directions. Of course, you want the best at reasonable prices and we will be pleased to furnish you.

Prepare hot beds for early cauliflower, cabbage, egg plant, lettuce, onions, pepper and tomatoes.

FEBRUARY—Your hot beds should be planted this month. Plant onion seed and sets, carrots, extra early peas, parsnip, parsley, pie plant, asparagus and horse radish early in the month. Early potatoes about the 15th.

MARCH—Plant oats, corn, peas, both early and second early. Bed out sweet potatoes in hotbeds. Plant early tomatoes in hotbeds early this month, also pepper and egg plant. Plant onions, lettuce, radishes, mustard, leek, parsley, spinach, parsnips, salsify and stock beets.

APRIL—Plant celery, turnips, okra, peas, corn, lettuce, radishes, so as to have a succession. Plant early squash, early and second early beans, and tomato and sweet potato plants about the 10th or 15th. Begin planting cotton April 10th.

MAY—Melons, cucumbers, lima beans and pole beans, pumpkins, squash, blackeyed peas and okra should be planted. Plant cowpeas and peanuts. Set out tomato and sweet potato plants. Plant more beans, peas, lettuce, radishes, mustard and corn. Sow seed of late cabbage in beds. Finish planting cotton last of the month.

JUNE—Finish putting out plants for regular summer and fall crops. Plant late cabbage seed in hills in the field. Melons, cucumbers, squash and pumpkins should be planted now, also milo, corn, cowpeas, millet, cane and kaffir. Plant Mexican beans.

JULY—Plant pole and corn field beans. Make your last planting of corn, kaffir, cane, milo. Set out celery and cabbage plants. Sow turnips and rutabaga for fall and winter use. Plant cucumbers for pickling.

AUGUST—Plant beans for late fall use and a few cucumbers for pickling. Finish planting celery early in the month. Sow more turnips. Plant early cabbage for fall and winter use. Plant cucumbers for pickling.

SEPTEMBER—Prepare for late fall and early winter by planting beets, corn salad, kale, lettuce, mustard and spinach. Sow onion seed for winter and spring transplanting.

OCTOBER—Finish up the planting of last month and add mustard, lettuce and spinach for early spring. Plant winter radishes and onion sets.

NOVEMBER—Finish harvesting crops and prepare for winter.

DECEMBER—Foot up profits and losses and send to us for next season's catalog.

The above is not for the professional gardener. He knows more about it than we do, but we are often asked about these matters, therefore we have done our best and hope some one will be benefited.

Few changes have been made in the above since it was written by John B. Gill, 31 years ago.

Out of Town Orders

received by letter, phone or telegraph, are given the same prompt and careful attention as if you called in person. Freight, express, truck lines and mail reach out in every direction and give splendid service. Rarely do we hold an order over night, many are on the way back to you within an hour after we receive them.

We are always glad to see our customers in the store, but when you cannot come, write, wire or phone.

We are always here, ready to attend to business.

Pkt .05; $\frac{1}{2}$ oz .10; oz .15; $\frac{1}{4}$ lb .40; lb 1.25

Celery

The Roswell district produces a superior quality of celery. Plenty of water and fertilizer will produce good celery on most any soil. No one should attempt to grow celery on a large scale until they have had experience with small plantings, as celery growing is a trade of its own. Sow seed in April in beds in the open fields, reset in June, July and as late as August. Celery is bleached with boards, paper or banking with earth. This must be done with great care. Seed are slow to germinate. One ounce will produce 10,000 plants.

WHITE PLUME. Early variety, easily grown.

Pkt .05; $\frac{1}{2}$ oz .15; oz .25; $\frac{1}{4}$ lb .80; lb 2.50

THE CLIPPER GRAIN CLEANERS

The No. 1-B Clipper is a very convenient seed and grain cleaner for the farmer. Weighs less than 200 lbs., two men can move it with ease. While this is intended for hand power it is easily rigged to run with an engine or motor.

Full descriptive catalog mailed on request. Price \$40.00.

Drive pulley for power drive .50 extra.

The No. 147 Machine is the one which we use in our warehouse to clean the field seeds that we offer for sale.

If interested in a large power machine let us send you a "Clipper" catalog and quote you prices.

We have tried several cleaning machines and have yet to see one that will do the work of "Clipper".

This machine will clean alfalfa, cane, maize, oats, corn, barley, rye, beans in a satisfactory manner.

We do custom cleaning for the public. All kinds of seed, grain and beans are cleaned in a satisfactory manner and our charges are reasonable.

IRISH POTATOES

Irish potatoes are not generally a profitable crop to grow in the Pecos Valley but under certain conditions occasional planting will give fair returns. The Red Triumph and Irish Cobbler (white) are the two varieties which give the best satisfaction. Plant in February, harvest in June. Re-plant immediately for another crop in October.
